

PMI Risk Management Professional (PMI-RMP®) Workshop

The PMI Risk Management Professional (PMI-RMP®) credential is created in 2008 to recognize demonstrated knowledge and expertise in the specialized area of project risk management. Given the increasingly important role of risk control when delivering projects, it is no surprise that PMI-RMP® has quickly become a sought-after qualification that is pursued by professionals eager to advance their career.

This four-day (30 contact hours) instructor-led course provides a combination of lecture learning and hands-on experience to you. It aims at preparing you for the PMI-RMP® certification examination as well as providing you the opportunity to get real-world risk management experience through a series of hands-on exercises.

This course is structured based on the four project risk management domains of the PMI-RMP® certification examination: 1) Risk Communication; 2) Risk Analysis; 3) Risk Response Planning; 4) Risk Governance. It will cover the following areas:

- Domain I: Risk Communication
 - Building a communication foundation
 - Gathering and documenting risk relevant information through effective communication
 - Communicating risk information
 - Stakeholder management

- Domain II: Risk Analysis
 - Critical success factors for risk analysis
 - Tools and techniques for gathering and identifying risks
 - Tools and techniques for prioritizing risks
 - Quantitative methods appropriate to analyzing uncertainties
 - Establishing appropriate control limits

- Domain III: Risk Response Planning
 - Developing risk response strategy
 - Managing uncertainties
 - Tools and techniques for risk response planning
 - Developing contingency strategy
 - Presenting recommendations

- Domain IV: Risk Governance
 - Establishing metrics for risk management.
 - Creating risk management plan
 - Monitoring enterprise environmental factors
 - Refining risk policies and practices
 - Tools and techniques for monitoring risk performance
